

FOR IMMEDIATE RELEASE

Algoma Technology Services (ATS) Named 2026 MSP Titans of the Industry Awards Finalist

Sault Ste. Marie, Ontario – September 21, 2026 – Algoma Technology Services (ATS) has been named a finalist in the Women Owned/Led category of the 2026 MSP Titans of the Industry Awards, marking the second consecutive year the Sault Ste. Marie-based technology company has been recognized by the international awards program. In 2025, ATS was named a finalist in the Canada category, recognizing the company's growth and impact as a Canadian Managed Service Provider.

The MSP Titans of the Industry Awards recognize Managed Service Providers (MSPs) demonstrating leadership, innovation, client success and impact within the technology services industry.

For ATS, the recognition reflects several years of growth and transformation as the company has expanded its managed IT and cybersecurity services while continuing to provide telecommunications and integrated technology solutions. Today, ATS supports municipalities, Indigenous communities, healthcare and education organizations, businesses and non-profits across Ontario and into remote northern communities.

“I’m incredibly proud to receive this recognition, but what makes it meaningful is what it represents,” said Natalia Grant, Vice President of Operations at ATS. “We have worked hard to build an organization where our people are empowered to grow, where we continuously improve how we deliver services, and where our clients know they have a technology partner invested in their success. Being recognized alongside other women leaders in our industry is an honour and something I’m very proud to share with our entire team.”

Natalia has played a key leadership role in ATS's evolution and the development of its managed services operations, including strengthening project and service delivery, implementing operational standards and governance, developing employees and building scalable processes to support the company's continued growth.

The recognition also reflects ATS's commitment to developing the next generation of technology and business professionals through internships, mentorship, professional development and partnerships with local educational institutions.

“Natalia has been instrumental in the transformation of ATS and in building the operational foundation that has allowed us to grow,” said Ian Grant, President & CEO of Algoma Technology Services. “She brings structure, accountability and a genuine commitment to developing people, while never losing sight of the experience we provide our clients. This recognition is well deserved, and our entire team is extremely proud to see her leadership recognized on an international stage.”

ATS's approach combines managed IT, cybersecurity, cloud services and strategic technology planning with its longstanding expertise in telecommunications and integrated technology. The company focuses on helping organizations strengthen their technology environments, reduce risk and plan strategically for the future.

“Technology continues to change incredibly quickly, and our clients are being asked to navigate more complexity and risk than ever before,” Natalia added. “Our responsibility is not simply to respond when something goes wrong. It is to help our clients become more secure, resilient and prepared for what comes next. That mindset has shaped how we have built our managed services practice and how we continue to evolve as an organization.”

Winners of the 2026 MSP Titans of the Industry Awards will be announced on **December 9, 2026, at the Beverly Hilton Hotel in Beverly Hills, California.**
